

# COVID-19 IgM/IgG Rapid Test Kit

## Diagnostic kit for anti- 2019-nCoV IgM/IgG Antibodies

It is a solid phase immunochromatographic assay for the rapid, qualitative and differential detection of IgG and IgM antibodies to 2019 Novel Coronavirus in human whole blood, serum or plasma. It is about a preliminary test result but essential one because of the rapid race of humanity against the deadly virus.

Any reactive specimen with the COVID-19 IgG/IgM rapid test Kit must be confirmed also with further clinical findings. Two test types available: Strip and Cassette types.

The sensitivity of the test kit is 96.88%, the specificity is 100%, the false positive rate is 0%, the false negative rate is 3.12% and the total conformity rate is 99%.

It is reliable, accurate, safe, convenient, and stable and has high clinical application value.

Available Certificates:

- People's Republic of China: Certificate for Exportation of Medical Goods (2020-K004)
- ISO 13485:2016 and EN ISO 13485:2016
- Declaration of Conformity (CE): KF-CE-5300S-01
- Quality Control (No:2020030403)
